e-Talent Canada

Trusted talent insights for the digital economy | Powered by ICTC's LMI data

e-Talent Canada is a unique interactive portal that provides: accurate, localized, and timely ICT labour market information. The portal presents job trends and HR tools applicable for all sectors of the Canadian economy. Other highlights include - which jobs are in-demand, who's hiring across Canada wages, demographics, educational programs and institutions that closely respond to the rapidly shifting industry needs; and several other important data points from a national, provincial and municipal level.

This interactive portal is intended to:

www.etalentcanada.ca

- Assist Canadians and newcomers to Canada in making informed career choices by increasing their understanding about the jobs in demand on a provincial and municipal level, which sectors are hiring, wages, required education and training options, etc. The tool also provides direct links to jobs advertised in the Job Bank (www.jobbank.gc.ca) as well as other links to national job sites;
- Provide the industry with insights about the talent supply and location, compensation, as well as many other features to help the industry find the necessary talent supply;
- Inform educational and professional development organizations about careers and skills in demand and help align education and training with industry needs;
- and support policy makers in making informed decisions on positioning digital talent as Canada's comparative advantage.
